Attached herewith are 5 sheets of descriptions for walkways and stairways located within the boundary lines of the Dayton's Store Site. Also there are 2 large sheets of drawings - Sheet B and Sheet C - that delineate each description, and each is cross referenced.

The parcels of land are for public use as an easement which is limited in height vertically as well as horizontally without overlapping either way in space.

The areas are in accord with the general plan as revised, which was supplied by Dayton's, for "H and RA Concourse Credits.

Each area has been measured in the field under my supervision to provide as built distances and heights except as noted under construction.

All areas are calculated to the nearest one square foot for each parcel.

Total area is 1,572 Sq. Ft.

To the best of my knowledge, each parcel is subjected to whatever encroachments or conditions in the form of partitions or doorway that exist therewith. The southerly portion of the third floor is being remodeled to provide for walkways and the footbridge.
