Dear Mr. Feisel;

Beg to advise that I surveyed Lot 16 and the East 43 feet of lot 17 at Rogers Lake placing Iron Monuments and line stakes for fence construction in the presence of your purchaser of this property.

Also beg to advise that I ran the line south from the road between lots 19 and 20 and placed iron at 705' which was 52 feet north of the waters edge which shows that the waters edge at this line is 1307' south of your north line and 13' north of your south line, then I turned off a right angle and ran east 150 feet to the line between lots 18 and 19 and found the waters edge to be 6' south of your south line or 1326' south of your north line although it is very evident that this 6' is boggy and with willows and in any sort of high water will be flooded, The other southerly points are all north and in the clear.

Yours very Truly
