Re: Potential Street Improvements
Project No. Minn. A-1-7

Dear Mr. Davis:

The attached map of the West Seventh Street NDP outlines a basically sound and substantial residential area around Palace Playground for which possible future street improvement work might be programmed. These potential street improvements would not only compliment the surrounding residential area and new playground development, but would also tie together and extend previous street improvement work done in 1969 and that scheduled for 1972.

It should be kept in mind, however, that all street improvements and preliminary engineering scheduled at this time must proceed at the City's own risk and expense without implicating the Authority. At such time that these streets would be included in an approved renewal program, your expenses may become eligible for reimbursement.

Sincerely,

A. Russell Harju
Development Supervisor
